

The Judy Company offers slope stabilization through a variety of geotechnical construction techniques. Our geologists and engineers have the ability and expertise to design and construct almost any type of slope stabilization taking into consideration soil makeup and chemistry, project requirements, difficult access, and needs for special equipment.

Applications include:

- [Rockfall Netting](#)
- Geotextiles
- [Rock Bolting](#)
- [Soil Nailing](#)
- [Retaining Walls](#) through:
 - soil nailing
 - tie-backs
 - beam and lagging
